

CAMP MONTESSORI 2015

ELEMENTARY AGES 6 - 12

8 WEEKS OF SUMMER FUN FROM JUNE 29 TO AUGUST 21

WEEK 1 : June 29-July 2 Party in the USA

We will start our summer camp by painting the town red, white, and blue. We will start off by creating our very own red, white, and blue tie-dyed t-shirts. We will bedazzle our bikes with stars and stripes to show off during the school-wide 4th of July parade. We will be dancing and singing all week long. The party ends with a delicious picnic lunch with hot dog, chips, and watermelon.

WEEK 2: July 6 – July 10 Sock Puppet Live

Watch out for the puppetarazis as they take over the school. We will be making our own sock puppet to star in our stories. We will learn how to write short stories with our fabulous sock puppet characters. For our entertainment, our sock puppets will perform in their own puppet theater.

WEEK 3 : July 13 – July 17 Photography Fun

Ready, set, shoot! Kids have a unique perspective on the world, and we will capture that through photography. We will learn about choosing a subject, what to focus on, and what we want our photos to tell others about. We will trek around the campus to take landscape and macro photography. We will cover the basics of ISO, aperture, and shutter speed. Most fun of all, we will showcase our photos at school.

WEEK 4: July 20 – July 24 Cardboard Arcade 1

Inspired by Caine's Arcade, we will build a cardboard arcade using ingenuity, physics, recycling, and reusing. We will design cardboard arcade games without electronics. We will start with an idea and inspiration from our favorite arcade games and make them come to reality.

WEEK 5: July 27 – July 31 Cardboard Arcade 2

We will continue creating cardboard arcade games by using cardboard, tape, paint, and junk. Our games will come with ticket dispensers, fast passes, and prizes. We will invite the whole school to play at the best kid-created arcade ever made.

WEEK 6 : Aug 3 – Aug 7 Star Wars: Myth, Science, and Jedi Training

We will explore the hero's journey, starship design, space planets, ecosystems, and perform science experiments. We will don our brown robes and pledge the Jedi Oath under the tutelage of a Jedi Master. We will create our own Star Wars movie trailer. May the force be with us!

WEEK 7 : Aug 10 – Aug 14 Frozen Theme Cartooning

We will learn how to draw like Disney animators. We will draw characters like Olaf, Princess Anna, and Queen Elsa. We will look at original sketches and how illustrators evolved from concept to final proof. We will learn how circles are important in creating these characters. There will be lots of doodles and coloring this week.

WEEK 8 : August 17 – August 21

Frozen: Science, Art and Sing Along

Calling all Frozen lovers! We will cool off from the summer heat with a week of Frozen. We will study the science of crystals, make crystal art, explore the states of matter through observation, and sing fabulous Frozen songs. We will explore the Snow Queen's frozen realm, the stories, and science that surround her snowy, icy, and frozen land. Elsa and Anna will join us for the coolest Frozen party.
